System Manual

Risk warning

Before you begin trading on Real account please carefully consider your investment goals, risk and experience you have. It should be noted that Forex is a leverage based market. It should be remembered that leverage can work both in your advantage and disadvantage as well. Therefore there is high risk of losing a part or all of your financial input placed on your account and because of that you should remember to trade with the amount of money which you can lose without taking any influential financial damage.

Trading Modes

System provides three different trading styles (templates) depending on your expectations, risk appetite and experience in trading.

FX PHANTOM SC

It's characterized by the fastest signals as well as the largest potential profit with increased risk. If you are familiar with scalping and catching the quick market movements, you should choose this trading mode.

Scalping mode is recommended for advanced traders.

FX PHANTOM DT

Is the most universal mode, providing the most balanced signals.

It provides stable signals with limited risk.

This mode is recommended for beginners as well as experienced traders.

FX PHANTOM SW

Provides the most secure signals, with less profit potential at the same time. Pick this mode if you want to spend the minimum amount of time in front of the computer.

This mode is recommended for every type of trader.

HOW DOES IT WORK.

Entry Examples

SELL TRADE

Wait for a red arrow on the chart. When it will appear (1) check if it's in line with the market trend (2). If both agree it's a valid sell signal.

You can also use additional confirmation by basket dashboard (3).

Example: You are trying to SELL AUD/USD pair. Check if the other AUD pairs are also in down trend (red color).

Entry Examples.

BUY TRADE

Wait for a blue arrow on the chart. When it will appear (1) check if it's in line with the market trend (2). If both agree it's a valid buy signal.

Additional confirmation by basket dashboard (3).
(it's not necessary, but such trade is more safe and it's got more profit potential)

Example: You are trying to BUY USD/JPY pair. Check if the other USD pairs are also in up trend (blue color).

HOW DOES IT WORK.

Exit rules.

Default: Wait for an opposite signal.

Other exit techniques:

- Use Risk to Reward ratios
